

Information for end users

Wall mounted units

Total comfort at home

Why choose Daikin?

Daikin is the world leader when it comes to air conditioning and heating. Thanks to our constant innovation in comfort, energy efficiency, control and reliability we define the benchmarks for quality within the industry.

✓ Comfort

Daikin wall mounted units are all designed to offer you the ultimate in comfort and convenience. Their advanced features control air flow, humidity and temperature, to create an ideal climate in your home.

✓ Energy Efficiency

Daikin's combination of advanced technologies ensure that every unit offers the greatest possible energy efficiency. Our wall mounted units have SEER and SCOP up to A+++ seasonal ratings for energy efficiency.

✓ Control

The Daikin Online Controller app allows you to monitor your heating system, control the operating mode and even automate certain actions wherever you are, using your smartphone. It's user-friendly and intuitive to operate.

✓ Reliability

Although all Daikin units are extremely reliable, we can offer a wide range of services to ensure that they are always in top condition.

The Bluevolution technology combines very high efficient compressors developed by Daikin with the future of refrigerants: R-32.

BLUEVOLUTION

Why choose a wall mounted unit?

Unobtrusive in any room

Wall mounted units are simple to install and can be less intrusive than floor mounted units. They can be placed subtly, high on a wall, where they do not distract from your décor. Whether your rooms are large or small, we have units with the capacities to provide the climate you want and which suit your budget. We can offer you anything from high-efficiency design units, to units which offer excellent value for money.

What is an air-to-air heat pump?

Heat pumps extract heat from the outside air, even in cold weather. They use an electrically powered compressor and are extremely effective at heating a flat or a house. Daikin heat pumps are silent and discreet, and use state-of-the-art technology to keep your energy bills as low as possible. With a Daikin heat pump, 80% of the energy used to heat your home comes from the outside air, a free and infinitely renewable resource! For cooling, the system is reversed, extracting heat from the indoor air.

Why choose Daikin multi split?

A Daikin multi split system offers you unexpected possibilities in creating a comfortable and cosy home.

✓ Comfort

Less mounting space, less visibility, less noise

With a multi outdoor unit, you only have to find space to mount one unit on the façade of your house, so it's much easier to place it subtly and out of sight. What's more, as there's only one unit in operation, noise levels are dramatically lower than with multiple units.

Easier installation, wiring, piping and maintenance

By installing a single outdoor unit, you not only save on mounting equipment, wiring and drain piping, you also save time and thus installation costs. Having a single unit reduces the unlikely event of a technical problem even further.

Pair split or multi split combination – the direct system comparison

Conventional pair split installation for air-conditioning three rooms

Solution for the same situation with only one multi split outdoor unit

More flexibility: connect up to 5 indoor units of any style

One outdoor unit can run up to five indoor units, and each of those can be controlled separately. You also have a wider choice of units from our split and Sky Air series, as well as low capacity indoor units which are specially designed for small rooms. If you think you may need an additional indoor unit later on, simply choose a higher capacity outdoor unit and your system is future-proof.

✓ Energy Efficiency

Lower power consumption, high efficiency

Daikin Bluevolution technology combines our high efficiency compressors with R32, the refrigerant of the future. These large compressors are more efficient

than a number of smaller compressors with the same output, and their standby mode saves you a significant amount of energy.

Always in control, no matter where you are

The Daikin Online Controller application can control and monitor the status of your heating system or up to 50 split air conditioning units and allows you to:

Monitor:

- › The status of your air conditioner or heating system
- › Consult **energy consumption graphs**

Control:

- › The **operation mode**, set temperature, fan speed and powerful mode, air direction and filtering (streamer) function
- › Remotely control your system and domestic hot water
- › **Zone control**: control **multiple** units at once (Split and Daikin Altherma integrated bi-zone only)

Schedule:

- › Schedule the set temperature and operation mode with up to **6 actions per day for 7 days**
- › Enable **holiday mode**
- › View in an intuitive mode
- › 3rd party products & services integration via IFTTT
- › Demand control/power power limitation (Split only)

If this, then that

Programme your unit to reflect your lifestyle. Connectable with different appliances via the iFTTT platform, you can control all element of your home from a distance. For example: If you leave your house, then your heating will turn off.

IFTTT: make your work flow

IFTTT is a solution that connects compatible 3rd party products and services (smart meters, lights, thermostats, ...), so they work best for you.

Within IFTTT, 2 operation set-ups can be made:

- > DO: it simply executes an action (e.g.: on/off)
- > IFTTT stands for If This Then That and allows you to automate actions (Then That) depending on certain triggers (If This)

Example

IF you exit an area, **THEN** turn off the heating.

The trigger is location, which is determined by your smartphone. If you leave an area, such as your house for example, your heating will turn off automatically.

App with intuitive lay-out

Control operation mode, temperature, air purification, fan speed & direction

Schedule the set temperature, operation mode and fan speed

Monitor your energy consumption, set holiday schedule

Identify the rooms in your house

Daikin service

Creating the perfect indoor climate goes beyond purchasing and installing a product. It's also about achieving year-round comfort, energy efficiency, reliability and control. At Daikin, we offer a selection of support and maintenance services to ensure your system achieves optimal performance throughout its lifetime.

An optimal installation at minimal cost

Through our support services a well maintained installation achieves:

- ✓ Higher energy efficiency
- ✓ A longer life cycle
- ✓ Meets the latest legal and regulatory requirements

Supplier and service provider

From selecting the right climate solution to starting up, monitoring and maintaining it, Daikin is ready to support you through every step of the process. Even if you do not have a Daikin installation, you can still benefit from Daikin services provided by our helpdesk staff, and our team of qualified specialists and service engineers.

What we offer

- ✓ **Operation, maintenance and repairs**
Together with our Service Partners, we offer a range of service plans to oversee, manage and monitor your installation
- ✓ **Upgrades and optimisations**
To enhance the performance and extend the lifetime of your system, we have developed a variety of upgrades
- ✓ **Daikin commissioning service**
From the start up and testing to the final fine-tuning, our Daikin Service representatives are there to offer support for every step of the installation process. Our effective and efficient practices help all installers ensure a Daikin installation continues to run at peak performance
- ✓ **Daikin project support and helpdesk**
Whether it's selecting the right solution for your application or integrating our HVAC-R systems into your building management system, our experienced specialists and engineers are ready to assist you
- ✓ **Daikin warranty policy**
Daikin has a broad and transparent warranty policy. In specific contracts you can get, in addition to the factory warranty on parts, also warranty on labour
- ✓ **Components that you can trust**
All the components that make up a Daikin solution are high quality. This means that if a component is replaced by a Daikin installer, you can rest assured that your installation will maintain its peak efficiency and performance.

Stand By Me, my climate of security

With your new Daikin installation and Stand By Me service programme, you can rest assured you are benefiting from the best comfort, energy efficiency, usability and service available on the market.

Free warranty extension

The first advantage of **Stand By Me** is a free warranty extension:

- applies to both labour and parts
- begins immediately after registration

Quick follow-up by Daikin service partners

Daikin service partners are automatically notified when a customer registers their installation on www.standbyme.daikin.eu and needs maintenance.

Your customer is guaranteed:

- quick and reliable service
- management of all information related to their installation such as, registration documents, attendance records, maintenance records, etc.
- immediate access to the correct information contributes to flawless service

Extended warranty on parts

For a small fee, customers can extend the warranty on specific parts. **Stand By Me** guarantees:

- that each component is replaced quickly
- helps avoid financial surprises
- long life and smooth operation and all other benefits of a Daikin installation
- reliable service from official Daikin service partners

Daikin service partners work exclusively with Daikin parts and have all of the necessary technical knowledge to solve any issue that may arise

Ururu Sarara

The best of the best

Why choose Ururu Sarara?

✔ Comfort

The Daikin Ururu Sarara has five air treatment techniques and provides heating and cooling in a single unit for year-round comfort. The Ururu function maintains the moisture level in winter to achieve a comfortable balance without unnecessary heating. In summer, the Sarara function extracts excess moisture while maintaining an even temperature, avoiding the need for extra cooling. The unit provides fresh air even when the windows are closed. It has air purification and automatic filter cleaning which ensures that the air is constantly pure and free from allergens.

Flash Streamer: releases streams of high-speed electrons with strong oxidation power

Pre-filter: catches dust

Deodorising filter: odours are absorbed and broken down before the air is returned into the room

✔ Efficiency

Thanks to its energy-efficient compressor and heat exchange, the Ururu Sarara achieves the top SEER and SCOP rating of A+++.

BLUEVOLUTION

R-32

✔ Control

No matter where you are, the optional Daikin Online Controller gives you complete control of the climate in your home. You can set the temperature, fan speed, air direction and filtering. With its intuitive viewing mode, it's easy to programme temperature and operation with up to 6 actions for 7 days, monitor your consumption or identify different rooms in your home. IFTTT (If This Then That) means that you can automate certain actions, such as switching the heating off when you leave your home, or an area of your home.

Stylish

where innovation meets creativity

Why choose Stylish?

White FTXA-AW

Black FTXA-BB

Silver FTXA-BS

Blackwood FTXA-BT

NEW - FULLY SILVER

NEW - BLACK-WOOD WITH BLACK BODY

✓ Available in 4 colours

- › Users can choose from **four distinct colours** (white, silver, black and blackwood)
- › **Curved corners** create an unobtrusive and space-saving design
- › **Thin dimensions** make it the most compact design unit on the market
- › Simple panel enables variation in texture and colour to easily blend into any room
- › Award winning design: Stylish earned the Reddot award, the Good Design Award and iF award for its innovative look and functional capabilities

reddot award 2018 winner

GOOD DESIGN AWARD 2017

✓ Control

With your smartphone and the Daikin Online Controller app, you can create the perfect climate in your home, wherever you are. You can manage temperature, operating mode, air purification and fans with the interactive thermostat. You can create different schedules and operating modes, monitor energy consumption and even automate certain actions. The Daikin Online controller is standardly available on all Stylish units.

stylish

Sound dispersion and noise reduction are the results of a special fan design.

✓ Efficiency

up to **A⁺⁺⁺**

The specially designed fan optimises airflow for maximum energy efficiency and minimum noise. In conjunction with the heat exchanger, it delivers outstanding energy efficiency at sound levels which are practically inaudible in the room. As a result, the Stylish has energy efficiency classes up to A+++ in cooling and heating.

The intelligent thermal sensor measures the surface temperature of a room by dividing it into a grid with 64 different squares.

✓ Comfort

The Daikin Stylish's **intelligent thermal sensor** scans the room to establish its surface temperature. Once it has determined the temperature, the air is evenly distributed across the room before it switches to an airflow pattern which directs warm or cool air to the areas which need it.

The **Coanda effect** optimises the airflow for a comfortable climate. By using specially designed flaps, a more focused airflow allows a better temperature distribution throughout the whole room.

The Coanda effect creates two different airflow patterns depending on whether Stylish is in cooling or heating mode. On the top is the Coanda effect in cooling mode (ceiling airflow), while the bottom images demonstrate the Coanda effect in heating mode (vertical airflow).

Daikin Emura

Form. Function. Redesigned.

Why choose Daikin Emura?

The Daikin Emura is the result of ongoing research into creating superior air conditioning solutions for European interiors. The new generation's extra functions make it even more suitable for European homes. This has been confirmed by the fact that the Daikin Emura is the winner of the prestigious Reddot design award 2014, German Design Award – Special Mention 2015, Focus Open 2014 Silver Good Design Award 2014 and iF design award 2015.

✔ Comfort

Sitting in a constant flow of air can be very uncomfortable. The Daikin Emura's 2-area motion detection sensor makes sure that this doesn't happen by sending airflow to another zone. If it doesn't detect any people, it will automatically switch to the energy saving mode. And it does all this at an almost inaudible, whisper-quiet 19dBA.

✓ **Efficiency**

up to **A⁺⁺⁺**

The Daikin Emura's energy-saving technologies have earned seasonal efficiency ratings up to A+++ in cooling and A++ in heating.

BLUEEVOLUTION

✓ **Control**

Daikin's optional Online Controller app is intuitive and user-friendly. You can use it for an overview of your consumption or to manage your home's climate via your smartphone or remote control.

Perfera

The feel-good vision of the future

Why choose Daikin Perfera?

✓ Comfort

The Daikin Perfera is an all-in-one heating and cooling unit. To enhance your comfort all year round, it has an advanced Flash Streamer which ensures better air quality. It uses electrons to trigger chemical reactions with air molecules, capturing viruses and allergens.

Flash Streamer technology

Viruses and allergens were placed on the electrode of the streamer discharge unit and then photographed through an electron microscope after being irradiated.

(Testing organization: Yamagata University and Wakayama Medical University)

Virus before and after irradiation

Fungal allergens before and after irradiation

Pollen-based allergen before and after irradiation

✓ Efficiency

up to **A+++**

The Daikin Perfera has outstanding seasonal efficiency up to A+++ in cooling and heating.

BLUEVOLUTION

✓ Control

The Daikin Online Controller app means that you can control the climate in your home from wherever you are via your smartphone. The app allows you to create different schedules and operating modes, as well as monitoring your energy consumption. The Daikin Online controller is standardly available on all Perfera units.

Complete climate control with (de)humidification, air purification & ventilation with top efficiencies in heating & cooling.

Whisper quiet

3D Airflow

Auto fan

Titanium apatite deodorising filter

Online controller

✓ Comfort

Creating the perfect climate is what Daikin units are all about. To ensure a perfect balance in 'comfort mode', cooling air is directed upwards to avoid cold draughts, and when the unit is heating the room, hot air is directed downwards to avoid cold air at floor level. If the temperature in the room is too high or too low, 'powerful mode' will quickly adjust the temperature appropriately until the room reaches the right temperature.

Superbly silent

Loud units are a thing of the past. Daikin systems are nearly inaudible. Enjoy year-round well-being without distracting noise.

Better air quality with the Daikin Flash Streamer

Daikin's Ururu Sarara and Stylish and Perfera are all-in-one heating and cooling units that purify the air year round. Using electrons to trigger chemical reactions with air molecules, the Flash Streamer breaks down viruses, leaving you with perfect, allergen-free air.

Air flow

Daikin units' 3-D air flow function combines vertical and horizontal auto-swing to ensure that the stream of warm or cool air reaches the corners of even the largest spaces. Auto fan speed ensures that the fan is running at the right speed to reach or maintain the temperature you have chosen.

Filter

For your health, you want the air that you breathe to be free of dust, bacteria or other harmful particles. Daikin's titanium apatite deodorising filter removes airborne dust particles and decomposes the odours of tobacco and pets, for example. It also traps and even deactivates harmful organic chemical substances like bacteria, viruses and allergens.

✓ Energy efficiency

Creating a fresh climate at home is about more than just pure comfort. Daikin systems are easy on your wallet and good for the environment, too. The next-generation refrigerant R-32 and optimised compressors make sure you stay in your comfort zone.

Seasonal efficiency in heating and cooling

Daikin's range of advanced energy-saving technologies provide high seasonal efficiencies in heating and cooling up to A+++ , and our redesigned swing compressors are more efficient. Seasonal efficiency is a new way of rating heating and cooling products based on their energy efficiency over an entire year.

R-32: more efficient, better for the environment

Daikin uses R-32 refrigerant, a unit that emits fewer CO₂ emissions. That means they have lower global warming potential and are overall more efficient.

✓ Control

Daikin wall mounted units come with a standard wireless remote controller. Our online controller ensures that you are in control wherever you are. You can control your indoor units with an app (available for iOS and Android). The weekly timer can be set to start operation at any time on a daily or weekly basis.

✓ Service

With your new Daikin installation and Stand By Me service programme, you can rest assured you are benefiting from the best comfort, energy efficiency, usability and service available on the market.

Stand By Me advantages:

- › Free warranty extension to both labour and parts.
- › Daikin service partners are automatically notified when a customer registers their installation on www.standbyme.daikin.eu and needs maintenance.
- › Extended warranty on parts

Optimised
for heating

Solutions for even the coldest regions

Designed for colder climates, Optimised Heating 4 creates a comfortable interior environment while maintaining excellent energy efficiency ratings.

Reliability

To guarantee the seamless operation of your heating system, even in temperatures as low as -25°C , the Optimised Heating 4 range offers enhanced features.

Easy Installation: long piping

The Daikin Optimised 4 offers a quick and easy installation process, which includes extended piping: This longer piping is specifically adapted to accommodate the thicker walls of Scandinavian buildings, and help contractors cut down on installation time.

Extended auxiliary piping
Extended drain hose

50 cm

The fireplace scenario

Stylish FTXTA and Perfera FTXTM are flexible and easy to adapt for any room, including spaces that contain additional heat sources, such as a fireplace.

- › If the temperature in the room reaches the desired point set by user, the operation FIREPLACE LOGIC (if activated) will start automatically.
- › The unit will distribute hot air from the external source across the room using the unit's fan.
- › The fan speed and the intensity of distribution depends on difference between temperature set by user and actual temperature in the room (in case of big difference between these temperatures the air distribution will be more intensive)

Measured temperature in the room \geq set temperature
= Thermo off Fan auto adjust according to ΔT

The Coanda effect

The Coanda effect optimises the airflow for a comfortable climate. By using specially designed flaps, a more focused airflow allows a better temperature distribution throughout the whole room. (available in heating and cooling for Stylish FTXTA-AW)

Quiet operation

Stylish uses a **specially designed fan** to optimise airflow for higher energy efficiency at low sound levels. Sound dispersion and noise reduction are the results of a special fan design.

Intelligent thermal sensor

Stylish uses an Intelligent thermal sensor to detect the surface temperature of a room to create a more comfortable climate. After determining the current room temperature, the intelligent thermal sensor distributes air evenly throughout the room before switching to an airflow pattern that directs warm or cool air to areas that need it.

Dual Airflow

Our floor standing FVXM is ideal for heating comfort thanks to its dual airflow. Wide air flow coverage in both upward and downward directions allowing even air distribution.

During heating operating, your feet stay warm and the temperature through the room is evenly distributed. Maximum comfort will be ensured.
